Technical Leadership

Our research and product development teams are continually upgrading our product offering based on emerging market needs and new technology. Our goals are to solve end user problems, increase productivity and lower total grinding costs.

Grindwell Norton continually invests in plant, equipment and manufacturing processes that adhere to stringent quality standards set by Norton Co., USA, to improve the quality and consistency of our products. In fact, Grindwell Norton quality is the industry benchmark in many a product line.

Grindwell Norton's Authorised Dealer Network

Grindwell Norton products are supported by a national network of selected dealers and over 3000 stockists designed to meet the specific needs of the marketplace.

In turn, they are supported by Grindwell Norton's countrywide network of 19 Field Offices, about 60 Field Sales Engineers and 15 Product and Application Engineers.

If your needs are specific, Norton's fully trained application engineers and field sales personnel are available to resolve all your abrasive requirements.
